Test 1: Full Shift Assignment Flow

Test Steps:

1. In the main menu, select: 1. HR Manager
2. Enter password for access: "aadoss".
3. In the manager menu, select: 1. Employee management
4. Select: 1. Add new employee
5. Fill in the following details:
   Employee name: Dana
   ID: 111
   Bank account number: 123
   Employment type: Full-time
   Salary type: Global
   Salary amount: 15000
   Vacation days: 22
6. Select: 2. Update employee details
7. Enter employee ID: 111
8. Select: 3. Update employee roles
9. Select: 1. Add role to employee
10. Enter role name: Cashier
11. Return to the employee update menu
12. Select: 4. Grant/revoke shift manager certification
13. Approve the status change so the employee becomes a certified shift manager
14. Return to the manager main menu
15. Select: 2. Shift & assignment management
16. Select: 1. Shift schedule (create, view history)
17. Select: 1. Create new Shift
18. Enter:
    Day: Sunday
    Type: Morning
19. Select role number for Cashier: 1
20. Enter required number of employees: 1
21. Select 0 to finish and save the shift
22. Select: 3. Back (Return to Shift & assignment management)
23. Select: 2. Assignment (assign, edit, remove, replace manager)
24. Select: 1. Assign employee to Shift
25. Enter:
    Shift day: Sunday
    Shift type: Morning
26. Verify the system displays "MANAGER REQUIRED" and enter Employee ID: 111
27. Select role number for Cashier: 1
28. Verify the system warns about availability and Select: 1 (Yes) to OVERRIDE.
29. Return to the Shift schedule menu
30. Select: 2. View shift history
31. Verify that the created shift appears in the system and includes:
    Day: Sunday
    Shift Type: Morning

Shift Manager: Dana
Assignment: Cashier: Dana (ID: 111)

Expected Result:
-The employee is added successfully
-The role Cashier is added to the employee
-The employee is certified as a shift manager
-A new Sunday Morning shift is created
-The employee is selected as shift manager for the shift
-The employee is assigned successfully to the shift as Cashier
-The shift history displays the shift with the correct manager and assignment details

Actual Result:
-The employee was added successfully.
-The role Cashier was added successfully.
-The employee was certified as a shift manager.
-The shift Sunday Morning was created successfully.
-The employee was selected successfully as the shift manager.
-The employee was assigned successfully to the shift.
-In the shift history, the following details appeared:

Day: Sunday, Shift Type: morning
Shift Manager: Dana Assignments:
Cashier: Dana (ID: 111)

Status: Pass

Conclusion(?)-
The test passed successfully, confirming that the system supports the full workflow of employee creation, role assignment, shift creation, shift manager selection, employee assignment, and shift history
display.

Test 2: Manager Requirement and Assignment Override Flow
Test Steps:

1. In the main menu, select: 3. Load mock data
2. In the main menu, select: 1. HR Manager
3. Enter password for access: "aadoss"
4. In the manager menu, select: 2. Shift & assignment management
5. Select: 2. Assignment (assign, edit, remove, replace manager)
6. Select: 1. Assign employee to Shift
7. Enter:
   Shift day: Friday
   Shift type: evening
8. Verify the system displays: "MANAGER REQUIRED: This shift has no Shift Manager"
9. Enter Employee ID to assign: 999
10. Verify the system blocks the action and displays that the first person assigned MUST be a certified Shift Manager
11. Select: 1. Assign employee to Shift
12. Enter:
    Shift day: friday
    Shift type: evening
13. Enter Employee ID to assign: 333
14. Select role number for Cashier: 1
15. Verify the system warns that the employee is not available and asks for an OVERRIDE assignment
16. Select: 1 (Yes)
17. Select: 5 (Back)
18. Select 1. Shift schedule (create, view history)
19. Select 2. View shift history
20. Verify the system displays the shift with the new updated shift manager

Expected Result:
-The mock data is loaded successfully .
-The system identifies that the shift lacks a shift manager.
-The system prevents assigning a regular employee before a shift manager.
-The system detects that the certified shift manager is not available.
-The system asks for an override confirmation.
-The employee is assigned successfully as shift manager after override approval.
-The shift history correctly displays the newly assigned shift manager.

Actual Result:
-The mock data was loaded successfully.
-The system identified the shift lacks a shift manager.
-The system prevented assigning a regular employee (ID: 999) and displayed the correct error.
-The system detected employee (ID: 333) is not available and prompted for an override.
-The employee was assigned successfully as the shift manager after approving the override.
-The shift history successfully displayed Lola White (ID: 333) as the manager for the Friday evening shift.

Status: Pass

Conclusion(?)- The test passed successfully, confirming that the system enforces the shift manager prerequisite rule and correctly handles availability constraints by allowing authorized override assignments , and successfully updates the shift history.

Test 3: Shift History Preservation After Employee Termination

Test Steps:
1.In the main menu, select: 1. HR Manager
2. Enter password for access: "aadoss".
Add first employee-
3.In the manager menu, select: 1. Employee management
4. Select: 1. Add new employee
5.Fill in the following details:
Employee name: Dana
ID: 111

Employment type: Full-time
Salary type: Global
Salary amount: 15000
Vacation days: 22
Add second employee-
6. Select: 1. Add new employee
7. Fill in the following details:
   Employee name: Ron
   ID: 222
   Bank account number: 456
   Employment type: Part-time
   Salary type: Hourly
   Salary amount: 50
   Vacation days: 10
Add roles-
8. Select: 2. Update employee details
9. Enter employee ID: 111
10. Select: 3. Update employee roles
11 Select: 1. Add role to employee
12. Enter role name: Cashier
13. Return to the employee update menu & update employee 222
14. Select: 3. Update employee roles
15. Select: 1. Add role to employee
16. Enter role name: Security
Certify shift manager-
17. Update employee 111 again
18. Select: 4. Grant/revoke shift manager certification

19. Approve the status change so the employee becomes a certified shift manager
Create a shift-
20. Return to the manager main menu
21. Select: 2. Shift & assignment management
22. Select: 1. Shift schedule (create, view history)
23. Select: 1. Create new Shift
24. Enter:
   Day: Sunday
   Type: Morning
25. Select role number for Cashier
26. Enter required number of employees: 1
27. Select role number for Security
28. Enter required number of employees: 1
29. Select 0 to finish and save the shift
32. Enter : 3. Back
33. Select: 2. Assignment (assign, edit, remove, replace manager)
34. Select: 2. Replace shift manager
35. Enter:
   Shift day: Sunday
   Shift type: Morning
   Employee ID: 111
   Select Role for the Manager: Cashier
36. Select: 1. Assign employee to Shift
37. Enter:
   Shift day: Sunday
   Shift type: Morning
   Employee ID: 222
   Role: Security
38. Select: 5. back
38. Select: 5. back
39. Select: 1. Employee management
40. Select: 4. Fire employee
41. Enter ID: 222
42. Select: 5. Back
43. Select: 2. Shift & assignment management
44. Select: 1. Shift schedule (create, view history)
45. Select: 2. View shift history
46. Verify that the fired employee still shows on the Shift history:
   Dana as Cashier
   Ron as Security

Expected Result:
-Both employees are added successfully
-Both employees are assigned to the shift successfully
-Employee **222** is fired successfully
-The shift history still displays **both employees**, including the fired employee
-This confirms that firing an employee does not delete past shift history

Actual Result:
-Both employees were added successfully.
-Both employees were assigned to the shift successfully.
-Employee **222** was fired successfully.
-In the shift history, the system still displayed both assignments:
Day: Sunday, Shift Type: morning
Shift Manager: Dana
Assignments:
Cashier: Dana (ID: 111)
Security: Ron (ID: 222)

Status:
Pass

Conclusion:
The test passed successfully, confirming that the system preserves shift history even after an employee is fired. Past assignments remain visible in the shift history and are not deleted from the system.
