

Presentation Layer

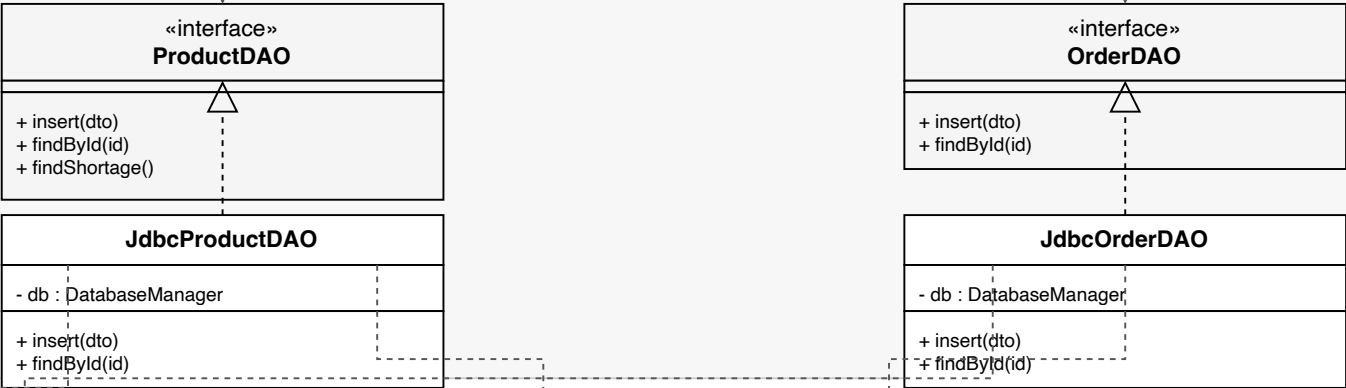

Service Layer

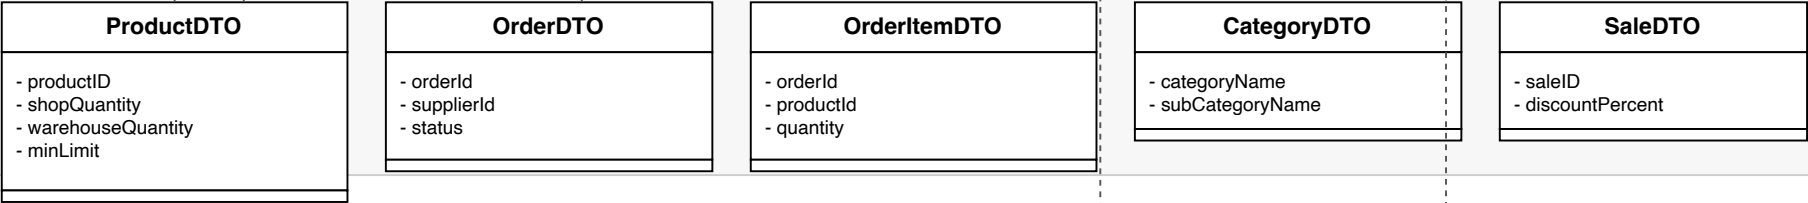

Domain Layer (Controller + «interface» Repository + RepositoryImpl)

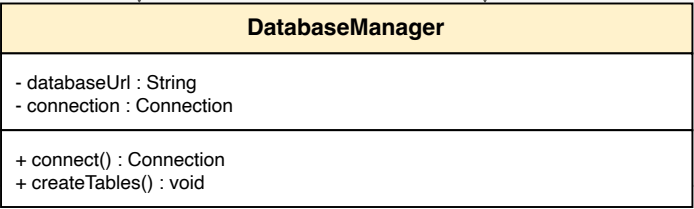

Data Access Layer : DAO («interface» DAO + JdbcDAO)

DTO Layer

Database

Category and Sale follow the same
Repository → DAO → DTO pattern:
• CategoryRepository(Impl)
• SaleRepository(Impl)
• JdbcCategoryDAO / JdbcSaleDAO
• CategoryDTO / SaleDTO

The combined class diagram shows only
the «interface» Repository; this diagram
details the DAO/DTO realization (NF-2).
